DETAILED ACTION

Allowable Subject Matter

1. **Claims 1, 2 and 4 (now respectively renumbered 1 – 3)** are allowed.
2. The following is an Examiner's statement of reasons for allowance:

The closest prior art discloses interpolation that uses pieces of color information of at least one color component of a target pixel and of pixels adjacent to the target pixel among a plurality of pixels that form image data. The interpolation is performed selectively for at least one color component of the target pixel in accordance with correlation between the target pixel and pixels in the vicinity of the target pixel.

However, the closet prior art does not teach or fairly suggest horizontal correlations that are calculated using G-pixel data of the G-pixels which are adjacent to the right and to the left of each of four peripheral pixels and vertical correlations that are calculated using G-pixel data of the G-pixels adjacent above and below each of the four peripheral pixels – the closest prior art does not compare green values of pixels in the positions recited above using the correlation calculations recited above.

3. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
